

(a) one key per event

three transactions read-modify-write
the same key in one block

15 MVCC conflicts over 5 revokes
retry budget exhausted (3 of 3)
revoke latency 9.47 s

(b) one key per (event, layer)

disjoint write sets; the event key is
read, never written

0 MVCC conflicts
retry budget free (1 of 3)
revoke latency 5.00 s
